

SAMPLE UNIVERSITY EXAMINATION PAPER

Data Structures & Algorithms

Semester 4 Academic Year 2023

Time: 3 Hours Max Marks: 70

Instructions

1. Answer all questions. 2. Assume suitable data if required. 3. Draw neat diagrams wherever applicable.

Part A ($10 \times 2 = 20$ Marks)

1. Brief question on Data Structures & Algorithms.
2. Brief question on Data Structures & Algorithms.
3. Brief question on Data Structures & Algorithms.
4. Brief question on Data Structures & Algorithms.
5. Brief question on Data Structures & Algorithms.
6. Brief question on Data Structures & Algorithms.
7. Brief question on Data Structures & Algorithms.
8. Brief question on Data Structures & Algorithms.
9. Brief question on Data Structures & Algorithms.
10. Brief question on Data Structures & Algorithms.

Part B ($5 \times 6 = 30$ Marks)

11. Explain an important concept of Data Structures & Algorithms with examples.
12. Explain an important concept of Data Structures & Algorithms with examples.
13. Explain an important concept of Data Structures & Algorithms with examples.
14. Explain an important concept of Data Structures & Algorithms with examples.
15. Explain an important concept of Data Structures & Algorithms with examples.

Part C ($2 \times 10 = 20$ Marks)

16. Design and analyze a comprehensive solution related to Data Structures & Algorithms.
17. Write detailed notes on advanced topics in Data Structures & Algorithms.
