

StudyHub - Semester 3 Syllabus

Bachelor of Technology (Engineering)

Demo syllabus for portfolio/project purposes.

Semester 3 Subjects

- **MA201** — Discrete Mathematics
- **CS301** — Object-Oriented Programming using Java
- **EC201** — Digital Electronics
- **CS302** — Computer Organization & Architecture
- **CS303** — Database Management Systems
- **CS304** — Operating Systems
- **CS351** — Java Programming Lab
- **CS352** — DBMS Lab

Course Outcomes

Students gain a solid understanding of discrete mathematics, object-oriented programming, digital electronics, computer architecture, database management systems, and operating systems. Hands-on labs reinforce Java programming and SQL/database concepts.

Recommended Books

1. Kenneth Rosen – Discrete Mathematics and Its Applications
2. Herbert Schildt – Java: The Complete Reference
3. Morris Mano – Digital Logic and Computer Design
4. Silberschatz, Korth & Sudarshan – Database System Concepts
5. Abraham Silberschatz – Operating System Concepts
